BORA COOL COMBI XL

BORA Cool Combi XL

Highlights

Maximum volume in the refrigerator compartment

The BORA Cool Combi XL impresses with its height of 194 cm, offering about 30 liters more volume compared to refrigerator-freezers with a height of 178 cm. Inconspicuously hidden behind the kitchen front, the space is optimally used as a refrigerator space. This allows you to store larger containers, storage containers and food items easily and neatly chilled. BORA Cool Combi XL fits into kitchen niches with standard width despite its increased height.

More flexibility in storage

The BORA Cool Combi XL offers more options for installing glass plates or tinned food storage shelves. This allows for even more flexible organization of the cooling area. This provides ample space for items of all sizes, allowing you to store them neatly and orderly.

Customizable accessories

More space in the larger refrigerator compartment for individual accessories, such as an additional multi-use spiked mat or more sorting tubs, which can be purchased separately in addition to the standard features packages. This ensures that the available space is used optimally.

Large fresh food compartment

In the fresh food compartment of the BORA Cool Combi XL, even more food stays fresh for longer. With BORA Fresh zero, the inside is split into two zones: a refrigerator area and a storage area. With our freshness system, featuring temperatures close to 0°C and humidity control through the special lids of the BORA Fresh zero tubs, food is optimally preserved for longer.

Effective BORA Cool odour filter

The newly developed BORA Cool odour filter, in its distinctive red design with an integrated activated charcoal core, reduces even strong odours in the cooling area thanks to its exceptionally large airflow surface in a compact space. The side notches on the filter make filter change (with a one-year service life) a breeze.

Technical data

Maximum power rating	1.4 A.
Supply voltage	220 - 240 V
Frequency	50 - 60 Hz
Power supply cable	2.2 m / plug type country specific
Dimensions (width × height × depth)	559 x 1938 x 546 mm
Weight (incl. accessories/packaging/net)	76 kg / 71 kg
Total volume	275 l
Refrigeration compartment volume	205 l
of which BORA Fresh zero	71.2 l
Freezer compartment volume	70 l
Number of controllable cooling circuits	2
Adjustable temperature range of refrigeration compartment	+3°C to +9°C.
Adjustable temperature range of freezer compartment	-15°C to -26°C.
Number of refrigeration compartment shelves	6
Number of BORA Fresh zero trays	2
Number of drawers in the freezer compartment	3
Defrosting procedure	No Frost
Storage time in the event of a fault acc. to GS	9 h
Freezing capacity in 24 h acc. to GS	6 kg / 24 h
Installation method	Built-in
Maximum door front weight for refrigeration compartment/ freezer compartment	19/12 kg
Door hinge	right variable
Door opening angle	115°
Airborne acoustical noise emission class	B
Airborne acoustical noise emission	33 dB(A)
Energy efficiency class	D
Energy consumption per year	207 kWh/a
Maximum filter service life	1 year
Guaranteed availability period for software updates (from product discontinuation date)	2 years

Product description

- BORA Fresh zero zone
- Connectivity module
- Cool odour filter
- 4-star freezer compartment
- No Frost system
- Refrigerator section dry back panel
- Soft closing damper
- Fixed door assembly
- LED multi-level lighting

Equipment

- 4x height-adjustable glass plates
- 1x height-adjustable bottle storage shelf incl. silicone mat
- 2x height-adjustable tinned foods storage shelf incl. silicone mat
- 2x removable BORA Fresh zero drawers incl. pull-out shelves and 1x humidity regulating cover
- 1x multi-tray incl. holding bars
- 1x parting layer incl. multi-pad
- 1x Cool odour filter
- 1x ventilator cover
- 3x freezer drawers

Functions

Power Cool, Power Freeze, Party, Eco, Holiday, Lock, Cleaning, Defrost, Door Alarm, Power fail alarm, Temperature fail alarm, filter change indicator

Scope of delivery

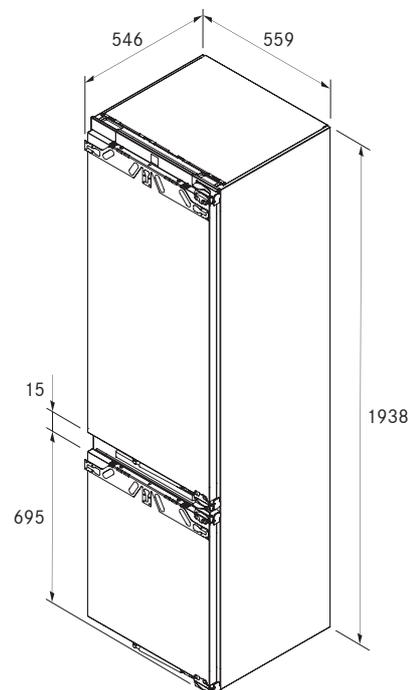

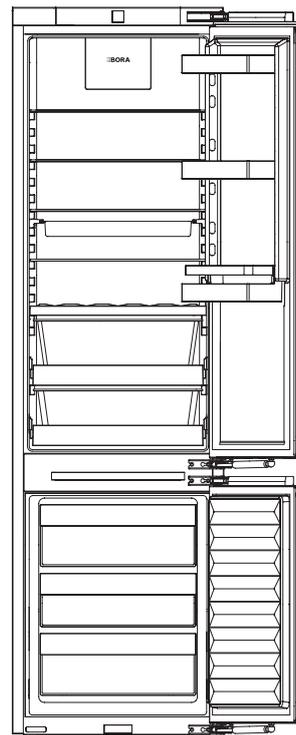

Cool refrigerator-freezer 194KG, country-specific power supply cable, operating and installation instructions, installation accessories

Accessories

Cool refrigerator-freezer features package Best , Cool odour filter, Multi-tray, holding bar multi-tray left, holding bar multi-tray right, bottle opener, serving board, multi-use hanging rack, multi-use spiked mat, storage box, sorting tubs, storage tray, cube form, refrigerator section glass plate, tinned foods storage shelf, bottle storage shelf, silicone mat for bottle storage shelf, multi-pad

Product and planning informations

- Variable door stop and changeable door seal
- 2x adjustable feet for height adjustment
- Levelling rails
- Magnetic strip between furniture and refrigerator

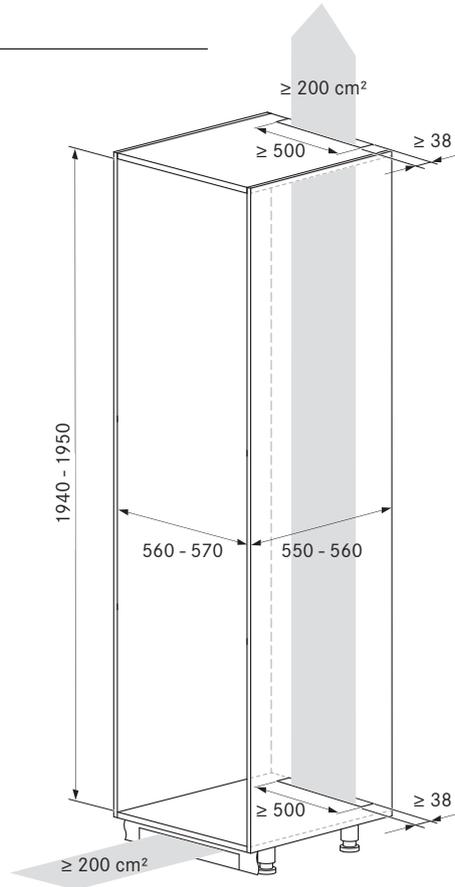

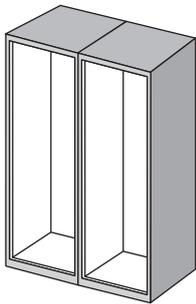

Installation dimensions / niche dimensions

Cool XL refrigerator-freezer

Installation in tall unit

Planning instructions:

- The BORA Cool Combi XL can be combined with the BORA Freeze freezer as a side-by-side version.
- Each appliance must be installed in a separate unit niche.
- A side-by-side combination with another BORA cooling and freezing system is not possible.

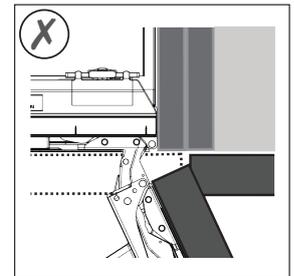

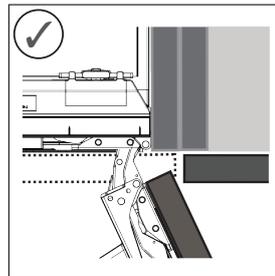

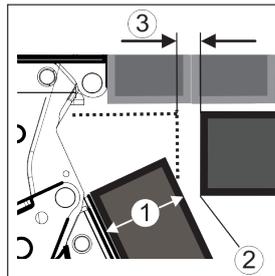

Clearance unit fronts

Cool XL refrigerator-freezer

Adjust the clearance without collision

- ① Front thickness
- ② Edge radius
- ③ Clearance

Clearance to match the front thicknesses

Front thickness	Edge radius 0 mm		Edge radius 1.2 mm		Edge radius 2 mm		Edge radius 3 mm	
	Clearance minimum	Clearance maximum	Clearance minimum	Clearance maximum	Clearance minimum	Clearance maximum	Clearance minimum	Clearance maximum
16 mm	0.3 mm	0.9 mm	0.1 mm	0.4 mm	0.1 mm	0.2 mm	0.1 mm	0.2 mm
19 mm	0.7 mm	2.4 mm	0.3 mm	1.9 mm	0.23 mm	3.25 mm	0.1 mm	0.8 mm
20 mm	2.0 mm	4.3 mm	1.5 mm	3.6 mm	1.0 mm	3.1 mm	0.6 mm	2.7 mm
22 mm	3.5 mm	6.3 mm	3.0 mm	5.6 mm	2.6 mm	5.3 mm	2.1 mm	4.6 mm
24 mm	5.5 mm	8.3 mm	5.0 mm	7.8 mm	4.5 mm	7.4 mm	4.0 mm	6.9 mm
26 mm	7.6 mm	10.7 mm	7.0 mm	10.3 mm	6.6 mm	9.9 mm	6.2 mm	9.4 mm

Planning instructions:

- If the clearance is greater than the two limit values, you do not need to make any adjustments.
- If the clearance is below the limit values, you need to increase the clearance. Another option is to increase the edge radius.
- If the clearance is between both limit values, you need to work precisely. In such cases, collisions can occur quickly.
